www.drnikunj.com

Summary

- Problem-solving, inquisitive and forward-thinking data scientist with 3+ years of experience in machine learning, data analytics and statistics
- Expertise in designing and implementing end to end advance data analytics solutions (requirement analysis, data gathering, quality checks, analyses, visualisation and presentation)
- Energetic team player with excellent project management, organisational and communication skills
- Valid Stamp 4 holder (full permission to work in Republic of Ireland)

Work Experience

Analytics Manager   Nov 2019 – May 2020
Group Internal Audit, Bank of Ireland, Dublin, Ireland

- Designed, planned and implemented analytical solutions covering key Group risks through SQL and Tableau
- Undertook integrated and individual assignments for senior management pertaining to Credit, Capital, and Customer Conduct for Retail and non-Retail products and services
- Assisted in the transition from Data Warehouse (Teradata) to Data Lake (Hadoop, Spark)

Data Scientist   Sep 2018 – Oct 2019
National Institute for Bioprocessing Research and Training (NIBRT), Dublin, Ireland

- Developed a monitoring and analytical platform for controlling and analysing biopharmaceutical processes, and forecasting and predicting risk
- Lead the development of Big Data solutions for biopharmaceutical process issues faced by our clients such as Living Lab (Siemens) and Allergan
- Played key part in deploying Hadoop and Spark (backend) and RShiny and Plotly (frontend) application
- Developed machine learning (supervised & unsupervised), time series (forecasting), and multivariate statistical models, using R and Spark (easily translatable to Python/Java)
- Managed and maintain code and documentation to high detail and clarity
- Provided strategic recommendations to senior management for improving process quality and final product yield, while decreasing downtime and freeing up resources

Statistical Modeller   Oct 2017 – Aug 2018
Centre for Food Safety, University College Dublin, Dublin, Ireland & Creme Global, Dublin, Ireland

- Planned, designed and executed data analytics solution (in R) for Ireland's 5 largest food manufacturing companies – within 8 months. Solution is under patent processing with NovaUCD and Crème Global
- Gathered and formatted complex large-scale microbiome data, and designed and implemented statistical models to (i) identify factors increasing/decreasing risk, and (ii) predict overall risk
- Effective data communication of modelling outputs (using smart visualisations) with industry partners resulting in effective changes in their production lines to prevent growth of pathogenic bacteria
- https://www.cremeglobal.com/food-safety-predictive-microbiome-risk-management/

PhD research graduate - Computational Infection Biology   Sep 2013 – Sep 2017
Conway Institute, University College Dublin, Dublin, Ireland

- Designed and executed the analyses of 2785 bacterial genomes using custom-built automated pipeline in Perl
- Designed statistical models (in R) to predict bioactivities of peptides
- Mentored and guided undergrad and graduate students for their projects in bioinformatics and machine learning
- Enhanced science communication by attending and organising conferences and symposiums, resulting in 9 presentations in oral and poster format (including best oral presentation award)
- Developed strong project management skills by collaborating with researchers in Ireland and abroad

Research intern - Molecular modelling   Jan 2013 – Jun 2013
CSIR - Institute of Genomics and Integrative Biology, New Delhi, India

- Created structural models of small peptides based on replica exchange molecular dynamics (REMD)
- Gathered experience in uploading and downloading data, and running scripts on supercomputer

Research project - Structural bioinformatics   May 2012 – Sep 2012
King's College London, UK

- Analysed over 400 protein complexes for their backbone hydrogen bonds, which led to identification of vulnerable bonds at the interfaces which differentiates transient and obligate protein complexes
- Gained experience in performing text mining (Perl) and statistical analyses (R)

Research project - Bioinformatics   Jan 2011 – May 2011
SASTRA University, Thanjavur, India

- Analysed and visualised 850 protein sequences belonging to snake toxins and identified over 100 distinguishable sequence properties, each with different weights
- Developed and implemented a classifier to classify snake toxins proteins and subsequently converted it to a webserver which was later published as TFTX server (http://sblab.sastra.edu/submittf.html)
- Organised and attended national level conferences, leading to 5 presentations (including Best innovator category presentation award)

Education

Computational Infection Biology, Ph.D   Sep 2013 - Sep 2017
University College Dublin, Ireland

Bioinformatics, M.Sc   Sep 2011 - Sep 2012
King's College London, UK

Bioinformatics, B.Tech   Jul 2007 - May 2011
SASTRA University, Thanjavur, India

Skills

- Extensive experience in R (7+ yrs), Perl (6+ yrs), Python (2+ yrs) and databases (SQL and MongoDB)
- Visualisation tools/packages – Tableau, Plotly, ggplot
- Big Data technologies – Hadoop, Hive, Spark (Python/R)
- Familiar with other languages such as Scala, Java, C, C++, PHP, CSS and HTML
- Other tools – Numpy, Pandas, Jupyter, Confluence, Jira, GitLab, Docker
- Experienced with Agile and Git development framework
- Expertise in several large-scale data analyses, with excellent data and project management skills
- Strong skills in stakeholders interactions
- Inquisitive and a keen learner
- Strive to finish tasks before deadline
- Tutored several students/professionals in R, Python and Spark through First Tutor website (https://www.firsttutors.com/ireland/tutor/nikunj.maths.computer-skills/)

Awards, honours and hobbies

Recipient of Wellcome Trust PhD scholarship amounting to €183,271

14 oral and poster presentations in conferences in India, Europe and USA

Organiser of 1 national and 1 international conference

2 travel grants for conferences in the UK and the USA

First introduced to computer science at 14, never looked back

Mountain climber (Kilimanjaro and Toubkal), chef, footballer, cyclist, globetrotter
